AUTHOR INDEX VOLUME 3 (1984/1985)

The issue number is given in front of the page numbers

Adiri, I. and E. Frostig, A stochastic permutation-flowship scheduling problem minimizing in distribution the schedule length (2)101–103
Aneja, Y.P. and K.P.K. Nair, Ratio dynamic programs (3)167–172
Avis, D. and L. Devroye, An analysis of a decomposition heuristic for the assignment problem (6)279–283
Brucker, P., An O(n) algorithm for quadratic knapsack problems (3)163–166
Bruneel, H., Buffers with correlated input and output interruptions (3)149–152
Bunn, D., I. Topping, Efficiency of the independence assumption in the combination of forecasts (4)173–178
Camerini, P.M. and C. Vercellis, The matroidal knapsack: A class of (often) well-solvable problems (3)157–162
Carter, P.L., *see* W. Remus (2)105–110
Chandrasekaran, R. and A. Tamir, On the integrality of an extreme solution to pluperfect graph and balanced systems (4)215–218
Chapleau, L., J. Ferland, G. Lapalme and J.-M. Rousseau, A parallel insert method for the capacitated arc routing problem (2) 95– 99
Chaudry, M.L., *see* D.D. Yao (1) 53– 56
Craven, D.B., Modified Kuhn–Tucker conditions when a minimum is not attained (1) 47– 52
Dafermos, S. and A. Nagurney, A network formulation of market equilibrium problems and variational inequalities (5)247–250
Dembo, R.S. and M. Haviv, Truncated policy iteration methods (5)243–246
Devroye, L., *see* D. Avis (6)279–283
de Werra, D., *see* S. Martello (5)275–278
Doshi, B. and E. Lipper, The throughput performance of a prioritized LIFO service discipline (2) 75– 80
Dudzinski, K. and S. Walukiewicz, A fast algorithm for the linear multiple-choice knapsack problem (4)205–209
Duffin, R.J., Duality inequalities as a numerical aid (2) 65– 68
Dyer, M.E. and A.M. Frieze, A simple heuristic for the p-centre problem (6)285–288
Dyer, M.E., A.M. Frieze and C.J.H. McDiarmid, Partitioning heuristics for two geometric maximization problems (5)267–270
Färe, R. and D. Primont, Efficiency measures for multiplant firms (5)257–260
Fathi, Y., *see* K.G. Murty (3)121–127
Ferland, J., *see* L. Chapleau (2) 95– 99
Frieze, A.M., *see* M.E. Dyer (5)267–270
Frieze, A.M., *see* M.E. Dyer (6)285–288
Frostig, E., *see* I. Adiri (2)101–103
Fujiwara, O., On the differentiability of optimal values for bounded nonlinear programs with equality constraints (4)219–224
Gallo, G., An O(n log n) algorithm for the convex bipartite matching problem (1) 31– 34
Hämäläinen, R.P., A. Haurie and V. Kaitala, Bargaining on whales: A differential game model with Pareto optimal equilibria (1) 5– 11
Haurie, A. and S.P. Sethi, Decision and forecast horizons, agreeable plans, and the maximum principle for infinite horizon control problems (5)261–265
Haurie, A., *see* R.P. Hämäläinen (1) 5– 11
Haviv, M., *see* R.S. Dembo (5)243–246
Heinkel, J., *see* R.P. O'Neill (5)227–236
Ho, J.K., Convergence behavior of decomposition algorithms for linear programs (2) 91– 94
Jackson, P., Debt vs. equity in a simple model with transaction costs, I: Form of the optimal policy (5)251–256
